# Christmas Day Climatology for West Central & Southwest Florida

Over the last century we have seen a wide range in the weather conditions on Christmas Day with some being warm and muggy while others have been cold and dry. This year we're looking at a rather cold and dry day with temperatures starting out in the 20s and 30s and then only climbing into the mid 40s to lower 50s. These temperatures are not expected to set any records for the coldest Christmas Day, but they will be in the Top Ten Coldest in most locations.

Below are tables listing the Warmest and Coldest Christmas Days broken down by high and low temperature, as well as the 1991-2020 normal (average) at sites across the region.

## Christmas Day High Temperatures (°F):

		Normal	Warmest High	Coldest High	Records
Location	ID	High	/Year	/Year	Began
